How Does Medicare Work?

There are four parts to Medicare, each providing different types of health care services. Medicare Supplement Insurance is often added on top of Parts A, B, and D to form a more complete medical coverage.

A Hospital Insurance

Helps pay for inpatient hospital care, skilled nursing facility care, home health care and hospice care. While most Americans are enrolled automatically in Medicare Part A, it alone may not cover all of your health care costs. Parts B, C and D are voluntary programs that provide additional coverage.

Medical Insurance B

Helps pay for covered doctor's services and many other medical services and supplies. If you don't enroll in Part B when you are first eligible for Medicare, you may have to pay a penalty later.

C Medicare Advantage Plans

Offers medical coverage through a network of providers, such as an HMO or PPO, that is an alternative to Original Medicare (Parts A & B). These plans may or may not cover prescription drugs.

Prescription Drug Coverage D

Helps pay for covered prescription medications. As with Part B, if you do not enroll when first eligible, you may have to pay a penalty later.

Medicare Supplement Insurance

Optional coverage helps to pay for expenses beyond what is covered by Medicare. There are several Medicare Supplement insurance plans, each with different benefits and premiums, so you can choose the plan that works best for your specific needs. Medicare Supplement insurance plans are identified by the separate letters A, B, C, D, F, High Deductible F, G, High Deductible G, K, L, M, and N. The basic benefits of each plan are exactly alike for all insurance companies.

If you already are a member of a Medicare Advantage plan, you cannot purchase a Medicare Supplement Insurance plan.

What Are My Plan Options and Coverage?

Medicare Supplement Insurance Plans are identified by the separate letters A, B, C, D, F, High Deductible F, G, High Deductible G, K, L, M and N. Each letter represents a different level of benefits. The chart below shows an overview of the different plan levels available from Blue Cross and Blue Shield of Texas.

What Does a Medicare Supplement Insurance Plan Cover?

All Medicare Supplement insurance plans help provide coverage for some of the costs that Medicare doesn't pay, including:

Copayments

An amount you may be required to pay as your share of the cost for a medical service or supply, like a doctor's visit, hospital outpatient visit, or prescription. A copayment is usually a set amount, rather than a percentage. For example, you might pay \$10 or \$20 for a doctor's visit or prescription.

Coinsurance

An amount you may be required to pay as your share of the cost for services after you pay any deductibles. Coinsurance is usually a percentage (for example, 20%).

Deductibles

The amount you must pay for health care before Original Medicare begins to pay.

- ¹ Not to exceed any charge limitation established by the Medicare program or state law.
- ² Plans cover medically necessary emergency care services needed immediately because of an injury or illness of sudden and unexpected onset, beginning during the first 60 days of each trip outside the USA. There is a deductible of \$250 and a lifetime maximum benefit of \$50,000.
- ³ The out-of-pocket annual limit may increase each year for inflation (2020 limits shown).
- ⁴ Plans F and G also have a high deductible option, which require first paying a plan deductible of \$2,340 before the plan begins to pay. Once the plan deductible is met, the plan pays 100% of covered services for the rest of the calendar year. High deductible plan G does not cover the Medicare Part B deductible. However, high deductible plans F and G count your payment of the Medicare Part B deductible toward meeting the plan deductible.
- ⁵ Plans K and L provide for different cost-sharing for items and services than the other plans we offer. Once you reach the annual limit, the plan pays 100% of the Medicare copayments, coinsurance and deductibles for the rest of the calendar year. The out-of-pocket annual limit does NOT include charges from your provider that exceed Medicare approved amounts, called "excess charges." You will be responsible for paying excess charges.
- ⁶ Plan N requires a copayment of up to \$20 for office visits and a copayment of up to \$50 for ER.

The best time to buy a Medicare Supplement insurance policy is around the time you turn 65. You have guaranteed acceptance during the six-month Open Enrollment Period that begins on the first day of the month in which you turn 65 and are enrolled in Medicare Part B. If you are under age 65, have Medicare Part A and are within the six months following your enrollment for Medicare Part B, your acceptance is guaranteed for Plan A. If you are under age 65 and on Medicare, you will also have a six-month Open Enrollment Period when you reach age 65, beginning on the first day of the month in which you turn 65. In any scenario, you must have Medicare Part B to be eligible for a Medicare Supplement insurance policy.
